

## PLANT CARE

# FOLIAGE+FERNS

### LIGHT

Place in bright, indirect sunlight. Remember to rotate your plant periodically to allow for even light distribution.

### TEMPERATURE

Keep at room temperature (65-80° F) away from drafts and vents for best growth.

### WATERING

Keep soil moist. Feed with half-strength, all-purpose fertilizer once a month to encourage new growth.

### TIPS

If decorative pots do not feature a drainage hole, empty excess water immediately after watering.
